Digital Literacy
Difficult to define
and has multiple definitions
Literacy is not simply one thing but rather a range of interconnected skills and practices
the ability to participate in the dominant modes of discourse of a particulary era
the awareness, attitude and ability of individuals to appropriately use digital tools and facilities to identify, access, manage, integrate, evaluate, analyse and synthesize digital resources, construct new knowledge, create media expressions, and communicate with others, in the context of specific life situations, in order to enable constructive social action; and to reflect upon this process.
influenced by
like a weather system
multiple factors
that
constantly and unpredictable change
in response to
current evironmental (digital) conditions
like a puzzle
with
infinite similar pieces
that
fit in multiple places
to create
a 3D picture
that can be
Individualized
based on
Technical skills required
Social environment
Cultural environment
Digitally capable?
can be demonstrate via
ePortfolios
growth is fuelled by
Changing needs of the learner
Knowledge economy
Changing nature of learning
ideally
Retrievable
Organized
Flexible
Owned by the user
are
Digital enactments of paper portfolios
used to
Plan and set goals
Capture and store evidence
Present to an audience
Demonstrate competency
Collaborate
Reflect on learning
Give and receive feedback
contains artifacts that demonstrate
Attributes
Skill
Learning acquired from experience
like
"It" or technical skills perspective
Critical thinking and problems solving skills as will
which attempt to test
iSkills
using tests like
Educational Testing Services (ETS) US
International Society for Technology in Education (ISTE)
OECD Program for International Student Assessment (PISA)
Mircosoft Digital Literacy Curriculum
Global Digital Literacy Council IC3 offered by Certiport
is
needs
A framework
to
Access/Manage
Network
